Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims **1-5**, drawn to a process for microwave destruction of solid contaminated waste, classified in class 204, subclass 157.15.
- II. Claims **6-9**, drawn to a process for the microwave destruction of a liquid contaminated waste stream, classified in class 204, subclass 157.15.
- III. Claims **10-14**, drawn to a process for the microwave destruction of a gaseous contaminated waste stream, classified in class 204, subclass 157.3.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions and different effects.

Group I is directed to the microwave destruction of solid contaminated waste.

Group II is directed to the microwave destruction of a liquid contaminated waste stream.

Group III is directed to the microwave destruction of a gaseous contaminated waste stream.

A solid, liquid and gas are distinct materials.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
